

Project Learnings

Network Intrusion Detection

- Which supervised algorithm operates best with which data.
- Importance of data processing.
- Working principle of multilayer perceptron.

Pandas Sales Analysis

- Deep understanding of pandas library.
- The ability to perform feature engineering.

CTR Prediction (Master Project)

- Deep understanding of how the AI algorithms work.
- The connection between advertisement and data.
- How to work with large datasets.
- How to implement cloud computing in order to train the model.
